

Visit Sunny Chernobyl: Adventures in the Worlds Most Polluted Places

The lifeless moonscape of Canadas oil sand strip mines. A vast vortex of plastic floating endlessly around the Pacific. An eerie abandoned town square in a radioactive Ukrainian wilderness. These are the places the tourist boards would rather you didnt see. The places that dont show up in any guide books. And the places that, six years ago, journalist and film-maker Andrew Blackwell set out to explore. Visit Sunny Chernobyl is the wry, funny, sometimes poignant tale of his trip through the worlds most degraded environments.
